

VENUS

V-FIL Polyester Filament High Tenacity

Excellent for overedging seams, blind stitching seams and quilting on various materials : trousers, skirt, uniform, suit, bed linen, clean room garment, etc.

Venus V-FIL

(HIGH TENACITY MULTIFILAMENT)

100% Polyester continuous multifilament sewing thread

Venus V-Fil is made from the high tenacity polyester multifilament designed specially for sewing on the high quality products.

The thread offers the great variety of applications due to its ultra-high breaking strength, smoothness uniformity and laundering durability.

The product is highly recommended for overedging seams, blind stitching seams and quilting on various materials.

Water repellant treatment on Venus V-Fil is also available for some specific applications.
